

SWEATA SWAGAT PANDA

AUTOMATION TEST LEAD | QUALITY ENGINEERING & TEST DELIVERY LEADER

Playwright (TypeScript) & Tricentis Tosca | AI-Driven Test Transformation

s.swagatpanda@gmail.com | +91 97786 32345 | India | linkedin.com/in/sweata-swagat-panda | github.com/sweata-swagat-panda

PROFESSIONAL SUMMARY

Quality Engineering and Test Automation leader with **7+ years at Accenture** managing end-to-end test-delivery for AI-powered Finance & Accounting platforms across **Procure-to-Pay (P2P), Record-to-Report (R2R), and Order-to-Cash (O2C)**. Manages a **22-member automation team across 4 concurrent client programs**, owning hiring, performance management, and capability building (**100+ interviews conducted; 11 engineers mentored, 6 promoted**). Drove **\$1.9M+ in automation-led savings** and **50-70% faster delivery** across **250+ client implementations**, governed on Azure DevOps and Jenkins/GitHub CI/CD. Pairs hands-on dual-stack depth - **Playwright (TypeScript) and Tricentis Tosca**, plus Agentic-AI test transformation - with an **Executive Programme in General Management from IIM Calcutta**.

LEADERSHIP & DELIVERY COMPETENCIES

Team & Performance Management (22 engineers) | Hiring & Talent Development (100+ interviews) | Delivery & Program Governance | Budget Influence & Cost Optimization | Test Automation Strategy & Center of Excellence (CoE) | Quality Engineering Transformation | Capacity & Resource Planning | Stakeholder & Executive Management | Risk-Based Testing & Quality Governance | Agile / Scrum Delivery

TECHNICAL SKILLS

Test Automation: Playwright (TypeScript, config-driven), Tricentis Tosca (model-based, Modules/TBox, TestCase-Design, TQL, Tosca API), Pytest (Python), Selenium WebDriver; Page Object Model (POM), Data-Driven, Keyword-Driven, Hybrid & BDD patterns

AI & Agentic Automation: MCP (Model Context Protocol) servers, AI agents, reusable skills & event-driven hooks, Gen AI / Agentic AI test design, Vision AI, self-healing locators, LLM-assisted test generation

CI/CD & DevOps: Azure DevOps (Pipelines, Repos, Test Plans, Boards), Jenkins, GitHub, YAML pipelines, Git, multi-VDI execution grids

API & Performance Testing: Playwright API, Pytest + Requests, Postman, Tosca API, k6 (performance & integration testing)

Accessibility: axe-core, WCAG 2.x compliance testing

Test Management & Reporting: Azure Test Plans, TestRail, JIRA, HP ALM, Allure / HTML reporting, Power BI dashboards, end-to-end defect lifecycle

Languages: TypeScript, JavaScript, Python, Java, SQL

Domain: Finance & Accounting (P2P, R2R, O2C), Invoice Processing, AP/AR, Reconciliation, SAP / Oracle / third-party ERP integration

Methodologies: ADLC, Agile / Scrum, SDLC / STLC, SIT / UAT, Shift-Left, Risk-Based Testing

PROFESSIONAL EXPERIENCE

Accenture, India

2019 - Present | 7+ Years (progressive promotions)

Automation Test Lead | 2025 - Present

Senior Analyst, Test Automation | 2022 - 2025

Analyst, Test Automation | 2021 - 2022

Associate, QA / Test Engineer | 2019 - 2021

- Manage a **22-member test-automation team (11 direct mentees, 6 promoted)** across P2P, R2R, and O2C programs; own hiring, performance reviews, and career development - conducting **100+ interviews** across automation, accessibility, performance, and functional testing.
- Direct end-to-end delivery across **4 concurrent client programs**, governing the full **Automation Development Life Cycle (ADLC)** - estimation, planning, execution, and release-gating - for AI-powered Finance & Accounting platforms.
- Delivered **\$1.9M+ in cumulative automation and test-delivery savings** across 250+ client implementations; influence the overall delivery budget while owning the product-testing phase, with ROI tracked via **Power BI dashboards** reported to senior leadership.
- Directed the team to build **dual-stack automation frameworks - Playwright (TypeScript, config-driven) and Tricentis Tosca (model-based)** - automating **3,780+ of 4,900+ test cases (~77% coverage)** and cutting test cycles **50-70%** across the portfolio.

- Sponsored **AI-augmented test transformation using MCP (Model Context Protocol) servers**, AI agents, reusable skills, and event-driven hooks - enabling self-healing locators, auto-generated test data, and intelligent test selection across the practice.
- Instituted **CI/CD and quality-gate governance** on Azure DevOps (YAML, multi-VDI) and Jenkins/GitHub, reducing post-release defect leakage **~30%** while surfacing **11,000+ defects** across flagship AI platforms.
- **Own senior stakeholder and client relationships**: define SIT/UAT strategy with Operations and client business teams, and present automation ROI, coverage, and quality dashboards through **steering committees and internal leadership reviews**.
- **Established engineering standards** - code reviews, reusable libraries, and onboarding - and mentored engineers on Playwright/TypeScript, Pytest, Tosca, and AI-driven testing; championed Agile/Scrum and Shift-Left for SLA-compliant delivery.
- Led the **R2R reconciliation program (120+ clients)** on Tricentis Tosca model-based automation: **600+ test cases automated, ~\$600K saved**, test cycle compressed from 2 weeks to 1 week.

KEY PROGRAMS DELIVERED

- **Invoice-to-Pay (I2P) - Agentic AI Platform | 13 clients | Playwright + TypeScript**: Led functional, regression, and ERP-integration testing for a 17-agent platform. Automated 1,320 of 2,000+ test cases; k6 performance/integration testing (IDVS to I2P); CI/CD on Azure DevOps; timeline cut 2 months to 3 weeks; 3,000+ defects; ~\$300K saved.
- **Automated Accounts Payable (AAP) - Gen AI Platform | 22 clients | Playwright + TypeScript**: Owned integration testing for GL coding and PO mapping across 22 client landscapes. Automated 1,400 of 1,500+ test cases; k6 performance/integration testing (IDVS to AAP); CI/CD on Jenkins + GitHub; timeline cut 7 weeks to 2 weeks; 8,000+ defects; ~\$575K saved.
- **ReconSmart & Reconciliation - Record-to-Report (R2R) | 120+ clients | Tricentis Tosca**: Highest-volume program. Drove functional, data-validation, and reconciliation testing (model-based). Automated 600 of 700+ test cases; CI/CD on Jenkins + GitHub; timeline cut 2 weeks to 1 week; defects managed in JIRA; ~\$600K saved.
- **Document Flow Manager (DFM) - Legacy Invoice Processing | 40+ clients | Tricentis Tosca**: Led regression and document-flow validation (model-based). Automated 180 of 200 test cases; CI/CD on Jenkins + GitHub; timeline cut 1 week to 3 days; ~\$150K saved.
- **MSP - Vendor Invoice Generation | 30+ clients | Tricentis Tosca**: Model-based automation of vendor invoice generation. Automated 180 of 200 test cases; CI/CD on Azure DevOps; timeline cut 1 week to 3 days; ~\$150K saved.
- **ATCAT - Duplicate Invoice Detection | 15 clients | Tricentis Tosca**: Validated detection accuracy and approval/rejection routing (model-based). Automated 100 of 300 test cases; CI/CD on Azure DevOps; timeline cut 1 week to 3 days; ~\$200K saved.
- **Cevinio & Tradeshift - Third-Party Invoice Processing | 5 clients | Manual Testing**: Functional, integration, and acceptance testing on third-party applications.

CERTIFICATIONS

- **ISTQB Certified Tester** - Advanced Level (2021)
- **Tricentis Tosca** - Automation Engineer L1; Test Design & Automation Specialist L1 & L2; Query Language (TQL); Exploratory Testing Specialist; qTest & API Automation Specialist
- **Microsoft Certified** - PL-900 (Power Platform Fundamentals); AZ-500 (Azure Security Engineer Associate)

EDUCATION

- **Executive Programme in General Management** - Indian Institute of Management (IIM) Calcutta | 2022 - 2023
- **B.Tech, Electronics & Electrical Engineering** - KIIT University, Bhubaneswar | 2015 - 2019

AWARDS & RECOGNITION

- **TechStar Award** - Accenture (2022) | **ACE Award** - Accenture (2021, 2024)
- **Sparkling Star Award** - Accenture (2022, 2023, 2024) | **Tosca Community Award** - Tricentis (2024)
